Remote Monitoring and Management

SUCCESS STORY

New Haven Community Schools

How New Haven Community Schools in Michigan found the senso.cloud experience, from sales and onboarding through to technical support.

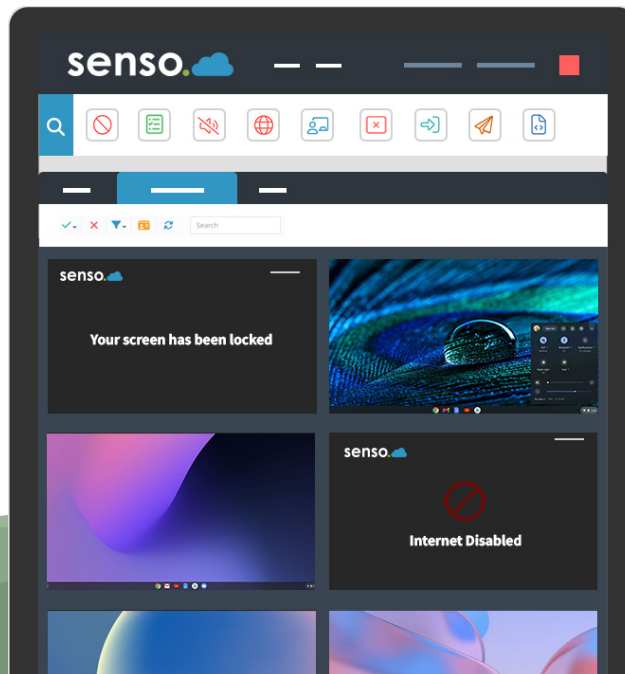

Industry: EDUCATION	Number of devices: 380	Bundles chosen: ENTERPRISE CLOUD
-------------------------------	----------------------------------	--

CLASSROOM MANAGEMENT SOLUTION

“The monitoring of students was the reason we purchased the software. I would highly recommend Senso for its capabilities of monitoring student usage in PC lab environments.

Having the training recorded was nice to allow staff members unable to join, to watch at their Leisure. Using YouTube as a video backup tutorial is great and I plan to use it as a reference.”

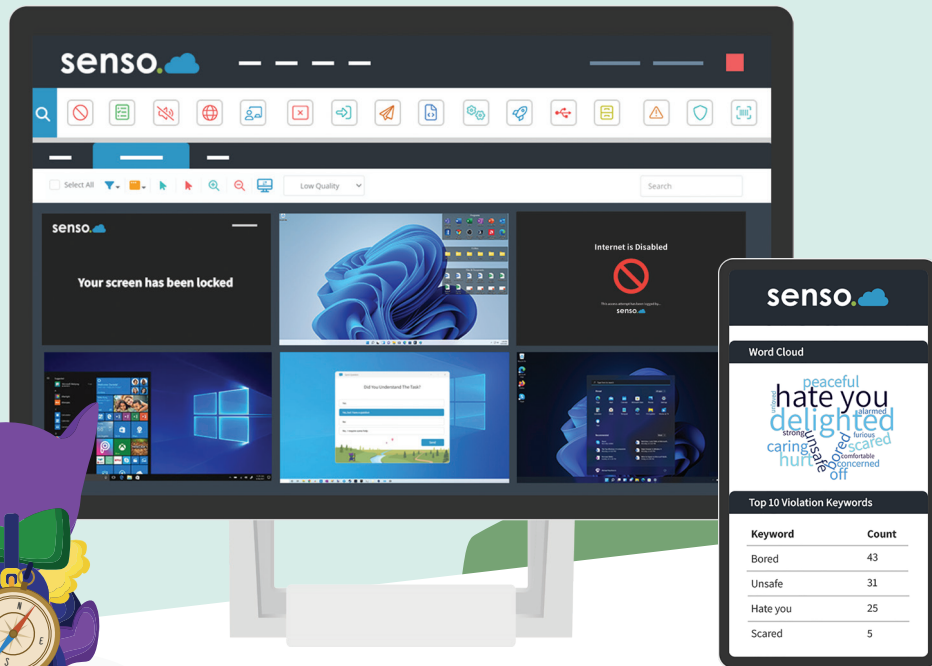

Monitor Multiple Devices

"SUCH PROFESSIONAL INDIVIDUALS"

"The sales team was extremely accommodating and the onboarding team was excellent.

The support team was top-notch and handled every case with expert level knowledge. They are very accommodating as we try to gain knowledge using the system. They were very patient and showed a willingness to help us."

"A GREAT EXPERIENCE"

"Overall, it was a great experience and it was really nice to work with such professional individuals."
