- ✓ **Saves you Time.**
Find your worse performing or least utilised machines to take action quickly.
- ✓ **Deep Dive.**
From CPU, memory and disk usage, to the activity history of a user.
- ✓ **Overview.**
Giving you a concise picture of the makeup of the devices and software.
- ✓ **Security.**
Peace of mind to know you are up to date and covered.
- ✓ **Performance.**
Monitor key performance metrics.

Next Level Asset Utilisation

Enabling better decisions on upgrades and renewals with key metrics that will allow budgets to be focused in the areas most required.

Monitor and manage your devices with ease.

ASSET CLOUD FEATURES

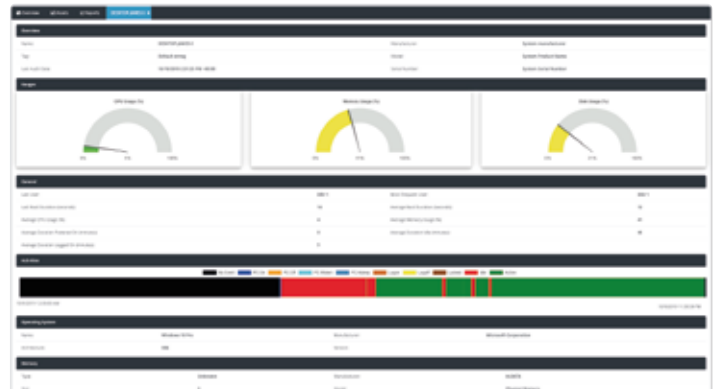

At a Glance

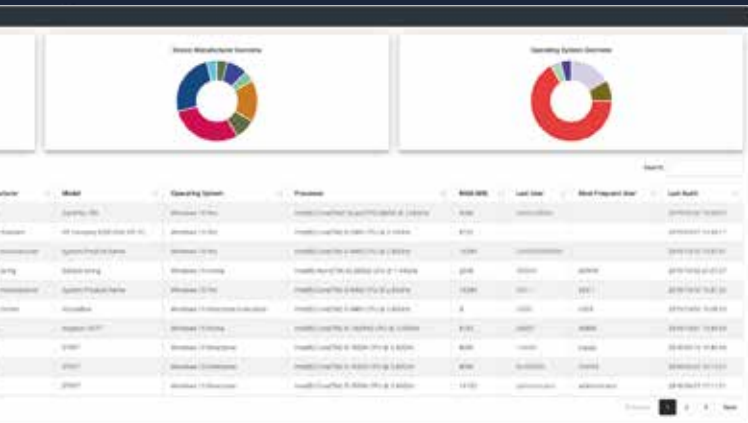

Find your worst performing or least utilised machines to take action quickly and effectively. Allowing you to focus your attention on the more important tasks.

Deep Dive

All you need to know in one place. From CPU, memory and disk usage, to the activity history of a user across 24 hour blocks. Senso will give you everything you need to know.

LET'S GET REPORTING!

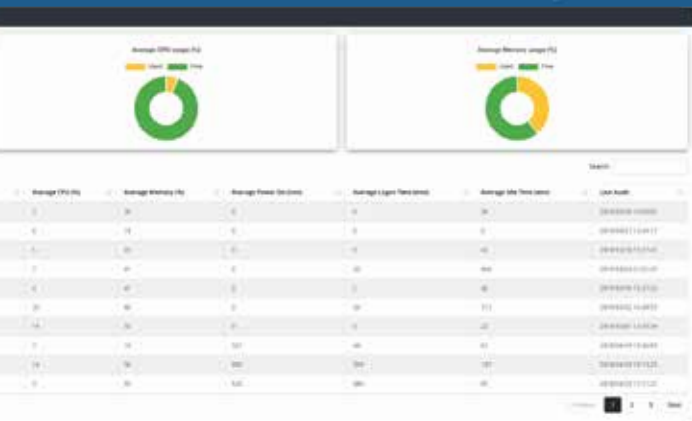

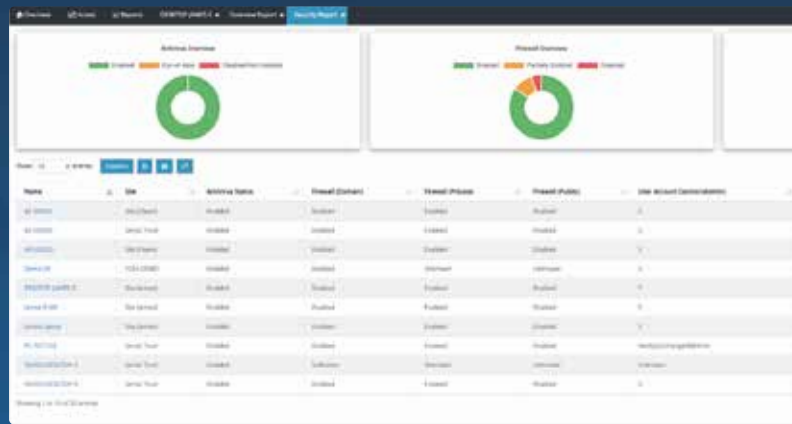

Overview

Keeping on top of things. Giving you a concise picture of the makeup of the devices and software across your estate, wherever they are.

Security

Giving you peace of mind. You'll always know you are up to date and covered, enabling quick identification of devices that need your attention.

Performance

Keeps you informed. Keeping user experiences at a high is a premium, having the tool to monitor key performance metrics is priceless.

Reporting and Alerts

Get up to date information about your IT estate including disk space, CPU usage and system changes. Alert Descriptions allow you to pin point issues and resolve them quickly.
