Lock Screen

Send File

Launch

Open an application or a specific website for the entire class to keeps students on target.

Send File

Access and send files from anywhere to single or multiple devices. Send File has the ability to run files as an administrator.

AI Driven Visual Threat Detection

Only Senso offers a visual threat intelligence feature as a standard component in its Safeguard Cloud bundle, providing early stage actionable intelligence to protect students, identify potential victims and prevent harmful content.

Visual content is everywhere - you can view, save and share easier than ever before. Senso provides a unique solution with visual threat technology driven by categories not general image labelling.
